

Astronomy at Watchtree

Once more, in collaboration with Watchtree Nature Reserve, Border Astronomical Society have organised a Starry Night observing session at the Reserve on Thursday 28 February 2019 from 7.00 pm until 9.00 pm

There will be a short Powerpoint presentation in the Centre on the night sky in February

There will be a £2 charge to Watchtree and Border Astronomical Society members.

Adult visitors £4

Students and Children £2

If clear we hope to observe the constellation of Orion, the Orion nebulae and other deep sky objects. The planets Mercury, Mars, and Uranus should also be visible.

Unfortunately the weather cannot be guaranteed but an extra astro talk will be given if viewing is not possible.

How to find us:
Watchtree is located between the villages of Wiggonby and Kirkbampton
SAT NAV CA5 6NL
